

사랑을 담아, -주

# With love, -Ju

VIRTUAL 3D EXHIBITION

I was inspired by the email from Professor Kim to students, and I made this work. Before graduation, 'How about making an Artech time capsule that opens 30 years later?' From the thought, I created an exhibition space with a warm atmosphere that contains memories from Art&Technology major.

In the exhibition space, letters with the words "with love, -Ju", portraits of professors, and portrait of students are placed. You can freely walk around the virtual exhibition space and enjoy the memories. The movement of the screen, footsteps sound and calm background music that seem to actually walk will add to the realism.
